SUMMARY OF OUR INDUSTRY

Steel is the world’s most important engineering and construction material. It is used in every aspect of our lives; in cars and construction products, refrigerators and washing machines, cargo ships and surgical scalpels. It can be recycled over and over again without loss of property.

Humankind’s future success in meeting challenges such as climate change, poverty, population growth, water distribution and energy limited by a lower carbon world depends on applications of steel.

The Indian steel industry has entered into a new development stage, post de-regulation, riding high on the resurgent economy and rising demand for steel.

In a de-regulated, liberalized economic/market scenario like India the Government’s role is that of a facilitator which lays down the policy guidelines and establishes the institutional mechanism/structure for creating conducive environment for improving efficiency and performance of the steel sector.

In this role, the Government has released the National Steel Policy 2017, which has laid down the broad roadmap for encouraging long term growth for the Indian steel industry, both on demand and supply sides, by 2030-31. The Government has also announced a policy for providing preference to domestically manufactured Iron & Steel products in Government procurement.

The government has also approved a Production-linked Incentive (PLI) Scheme for Specialty Steel. It is expected that the specialty steel production will become 42 million tonnes by the end of 2026-27. This will ensure that approximately 2.5 lakh crores worth of specialty steel will be produced and consumed in the country which would otherwise have been imported. Similarly, the export of specialty steel will become around 5.5 million tonnes as against the current 1.7 million tonnes of specialty steel getting FOREX of Rs 33,000 crore

- We do not own the premises in which our registered office is located and the same is on lease arrangement. Any termination of such lease/license and/or non-renewal thereof and attachment by Property Owner could adversely affect our operations.***

Our Registered Office is presently located at 2, Arihant Nagar, Punjabi Bagh, Delhi-110026, India. The registered office is not owned by Company, it is owned by Mr. Raj Kumar Goyal and Tanuj Goyal jointly.

The premises have been taken on lease basis for a period of 5 years commencing from January 01, 2021 to December 31, 2025.

Upon termination of the lease, we are required to return registered office premises to the Lessor/Licensor, unless it is renewed. There can be no assurance that the term of the agreements will be renewed on commercially acceptable terms and in the event the Lessor/Licensor terminates or does not renew the agreements, we are required to vacate our registered office business where administrative activities are carried out. However, our Company owned some premises in delhi where we can alternatively shift our registered office or in case our owned premises are not vacated we may be required to identify alternative premises and enter into fresh lease or leave and license agreement at less favorable terms and conditions. Such a situation could result in time overruns and may adversely affect our operations temporarily.

- Our Company may have not complied with certain statutory provisions of the Stamp Act, 1899 before year 2008. Such non-compliances / lapses may attract penalties and prosecution against the Company and its directors which could impact the financial position of the Company to that extent.***

Our Company has paid certain stamp duties on issuance of shares and some applications are filed with the concerned authorities, but are not processed. Thus, certain stamp duties are yet to be paid.

Further our Company doesn't have any documentary proof for the payment of state stamp duty on equity shares issued on or before year 2008.

4. Our company is facing low-capacity utilisation from production and manufacturing of products.

Since our company is into manufacturing and trading business, the capacity utilisation is an important factor to determine the strength and potential output that can be produced if capacity was fully used.

The capacity utilisation trend is given as below:

Capacity Utilisation for Products	Capacity Utilisation [in MT (Metric Tonnes)]		
	For the period ended 31 st March, 2022	For the period ended 31 st March, 2021	For the period ended 31 st March, 2020
Installed Capacity	2,44,001	2,44,001	2,47,000
Actual Production	70,791	88,015	1,24,198
%	29.01%	36.07%	50.28%

Our actual production is quite lower as compared to installed capacity of plant and machinery for production. It was 29.01% for the period ending March 31, 2022 and 36.07% for period ending March 31, 2021, while it was 50.28% for period ending March 31, 2020. There has been a downfall in overall capacity utilisation of manufacturing products. If this trend continues, this could adversely affect our business operations.

5. Non availability of initial period secretarial/ statutory records of the company filed with ROC since incorporation.

Since the company was incorporated in 1973, it is not possible to trace all secretarial records since incorporation. We are unable to trace copies of certain records. However, we have conducted a search report through practicing Company Secretary Neha Mishra having certificate of practice number 9211, dated April 17, 2022 for ascertainment of the information and reconciliation of secretarial data and records of the company.

We cannot assure you that the filings were made in a timely manner and that we shall not be subject to any penalty imposed by the regulatory authorities in this respect.

6. High dependence on debt and outflow of finance cost leads to huge outflow of cash flows and reduce overall profitability.

Due to manufacturing activities, our business is highly working capital intensive. We have to depend on borrowings (both secured and unsecured) to a great extent to finance our manufacturing activities. As on September 8, 2022, the secured borrowings stand at 10415.41 lakhs and unsecured borrowings stand at 407.14 lakhs. The indebtedness require us to dedicate a substantial portion of our cash flow from operations to payments of interests, thereby reducing the availability of our cash flow to fund working capital, capital expenditures and other general corporate expenditures. It limits our borrowing ability and places us at a competitive disadvantage relative to competitors that have less debt or greater financial resources.

There can be no assurance that we will be able to generate enough cash flow from operations or that we will be able to obtain enough capital to service our debt or fund our planned capital expenditures. In addition, we may need to refinance some or all of our indebtedness. For further details, please see “Statement of Financial Indebtedness” beginning on page 201 this Red Herring Prospectus.

7. There are several restrictive covenants in the loan agreements, which could influence our ability to expand, in turn affecting our business and results of operations.

We have availed credit facilities from various banks exclusively and in consortium. We have entered into agreements for term loans and financial facilities with our banker / lenders and the covenants in borrowings from bank / lenders, among other things require us to obtain permissions in writing in respect of, including, but not limited to effecting any change in the management/Board of the Company, transfer of controlling interest, capital structure of the Company; undertake any new project, implement any scheme of expansion or acquire fixed assets/machinery, enter into borrowing arrangement either secured or unsecured with any other bank/financial institution/Company or otherwise; except which are approved

by Bank/lenders, formulate any scheme of amalgamation, acquisition, merger, or reconstruction etc. Our Company has applied for the NOC from lead banker which is State Bank of India (SBI), however the approval from the bank is still under process. For further details on restrictive covenants, please refer to chapter “Statement of Financial Indebtedness” beginning on page 201 of this Red Herring Prospectus.

8. *The equity shares of our promoter are under pledge by consortium bank.*

Our Company has taken loan from various banks & the lead banker is State Bank of India (SBI), further as per sanction letter no. CBND/AMT-III/2021-22 issued by SBI dated February 2, 2022, 40% of equity shares of promoters of our Company shall always be under pledge with consortium bank. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, these shares may be forfeited by lenders. This covenant may have an adverse effect on the functioning and reputation of our Company. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our shares may be transferred to bank by virtue of loan agreement.

9. *Charge over company’s properties to finance the secured borrowings.*

Our company has created charge on various movable and immovable properties of the company to finance the loan. As on September 8, 2022 the secured borrowings stand at ₹ 10,415.41 Lakhs. We have also secured our lenders who have provided the fund based working capital facilities by creating a charge over our current assets, certain movable and immovable properties in respect of loans / facilities availed by us.

In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be forfeited by lenders. For further information on the financing and loan agreements along with the total amounts outstanding and the details of the repayment schedule, please refer to chapter “Statement of Financial Indebtedness” beginning on page 201 of this Red Herring Prospectus.

10. *Charge reflecting on MCA website that has been paid off.*

Our Company has availed various loan facilities for operating the business. These loans have been paid off and stand at Nil in the books of the company. However, the company is not able to file e-form CHG-4 for satisfaction of charge with ROC for clearance from MCA website, due to non availability of NOC, as the bank is not in existence, for following loan:

S No.	Bank/ Lender	Charge Id	Amount appearing on MCA
1.	The Sendrrs State Bank Limited	90042642	2,59,00,000

Any penalty or action taken by any regulatory authority in future for non-compliance with provisions of corporate and other law could impact financial position of the company to that extent.

11. *Non-Compliance in maintaining Board composition as per Companies Act 2013.*

Our Company was not compliant to maintain the requisite number of Independent Directors on the Board as per the provisions of Companies Act 2013 for a certain period. Mr. Naresh Kumar Bansal, who was appointed as Independent Director, resigned from his office on 31/07/2021. The intermittent vacancy was not filled within the next Board meeting due to non-availability of requisite person. However, the vacancy was filled with appointment of Mr. Vishal Dugar and Ms. Sony Kumari as Independent director on March 10, 2022, Such non-compliance was reported in the Annual return for financial year ending March 31, 2021. Hence such non-compliance may incur the penalties or liabilities which may affect the results of operations and financial conditions.

12. *Our Company has negative cash flows from its operating activities, investing activities and financing activities in the past and current years, details of which are given below. Sustained negative cash flow could impact our growth and business.*

Our Company had negative cash flows from investing activities & financing activities in the previous years and current

year and from operating activities in financial year ending March 31, 2019 as per the Restated Financial Statements and the same are summarized as under.

(₹ In Lakh)

Particulars	For the year ended on March 31

Net Cash Generated from Investing Activities	1419.05	(160.73)	(367.74)
Net Cash Generated from Financing Activities	(6,142.51)	(2367.78)	(3237.08)

- 13. Our top five states in north India contribute more than 70% of our revenues for period ended on 31st March 2022 & year ended on March 31st, 2021. Any loss of business from one or more of these states may adversely affect our revenues and profitability.**

Our company has a strong presence in northern India. The northern Indian states contribute to a substantial portion of our revenues for the period ended on March 31, 2022 & year ended March 31, 2021. Any factors relating to political and geographical changes, growing competition and any change in the demand for our service by customers of these states may adversely affect our ability to retain them. We believe we have maintained good quality standard for our products, however, there can be no assurance that customers of these states will continue to buy our products. We cannot assure that we shall generate the same quantum of business, or any business at all, from these states, and loss of business from one or more of them may adversely affect our revenues and profitability.

The contribution of top five states to our total revenue is as follows:

(figures are in %age)

Sr. No.	Particulars	March 2022	March 2021
01.	Haryana	20.35	23.92
02.	Himachal Pradesh	15.24	13.29
03.	Uttar Pradesh	16.27	10.90
04.	Punjab	9.42	13.03
05.	Rajasthan	9.19	13.85
	Total	70.47	74.99

For further details regarding geographical wise revenue bifurcation, please refer to chapter titled as our business on page no. 104 of this Red Herring Prospectus.

- 14. We import raw materials from certain countries. Excess dependence on import of raw material could be harmful for our company due to any trade barrier or government restriction on imports imposed in future.**

Since we import our products from various countries (such as South Korea, China, Japan etc.), we are subject to numerous, and sometimes conflicting, legal requirements on matters as diverse as import/export controls, trade restrictions, the environmental laws (including steel and metal waste), tariffs, taxation, sanctions, government affairs, anti-corruption etc. Non-compliance with these regulations in the conduct of our business could result in fines, penalties, criminal sanctions against us or our officers, disgorgement of profits, prohibitions on doing business and have an adverse impact on our reputation. However, we have been following laws of land and meet mandatory levels of product standards and safety

- 15. The steel industry is highly cyclical and a decrease in steel prices may have an adverse effect on the Company's results of operations and financial condition.**

We, being a steel pipe manufacturing company, face a lot of fluctuations in market. Steel is the basic raw material in our manufacturing, and due to its volatile price and highly cyclical nature, we face a lot of competition in the market. The price fluctuation is based on macro-factors such as employment rates, consumer confidence, inflation etc.

16. Our Company operates under several statutory and regulatory permits, licenses and approvals. Our failure to obtain and/or renew any approvals or licenses in future may have an adverse impact on our business operations

Our Company requires several statutory and regulatory permits, licenses and approvals to operate the business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Our Company is required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Further, these permits, licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant permits/licenses/ approvals. Failure by our Company to renew, maintain or obtain the required permits, licenses or approvals, or cancellation, suspension or revocation of any of the permits, licenses or approvals which may result in the interruption of our Company's operations and may have a material adverse effect on the business. For details please refer to chapter titled "Government and Other Statutory Approvals" beginning on page 213 of this Red Herring Prospectus.

17. Our Company depends on brand recognition and reputation and our ability to maintain or enhance brand image that we operate could have a material adverse effect on our business, financial condition and results of operations.

Our Company has developed its own brand "T.T Swastik". We believe that the recognition and reputation of brand among consumers has contributed significantly to the growth and success of our business. Maintaining and enhancing the recognition and reputation of brand is, therefore, critical to our business and competitiveness. Many factors, some of which are beyond our control, are important to maintaining and enhancing brand. These factors include our ability to: maintain the popularity, attractiveness and quality of the products and services we offer; maintain or improve consumers' satisfaction with our products and services; and increased brand awareness through investment in brand building initiatives, including through social media and marketing activities. Our consumers that use and recommend our products and services have come to expect a high level of efficacy and quality from our products and services, and our failure to deliver on that expectation could adversely impact our brand and reputation. As we expand into new geographic markets within India and as the market becomes increasingly competitive, maintaining and enhancing our brand image may become increasingly difficult and expensive. In addition, novelty of brand in these new geographic markets may diminish over time. If we fail to maintain our reputation, enhance our brand recognition or increase positive awareness of our products and services, which could have a material adverse effect on our business, financial condition and results of operations.

18. Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital or pay out debts, could adversely affect our operations.

Our business is working capital intensive and hence, trade receivables form a substantial part of our current assets and net worth. Our trade receivables as on March 31, 2022 were 14627.46 lakhs and inventories were 6,943.32 lakhs. Thus, major portion of our working capital is utilized towards debtors and inventory. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and dealers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations.

There exist substantial requirement of working capital and financing in the form of fund and non-fund based working capital facilities to meet our requirements. The details of our working capital in last 3 years are as under which is showing continuous increase:

(Amount in ₹ Lakh)

Particulars	2019-20	2020-21	2021-22
Current Assets			
Current Investments	0.00	0.00	0.00
Inventories	9228.68	6,938.25	6,943.32
Trade Receivables	12338.07	14,835.54	14,627.46
Cash and Cash Equivalents	866.71	687.08	723.19

Short-term Loans and Advances	1,548.68	1,764.69	2,536.54
Other Current Assets	1,583.60	1,503.55	1,516.33
Total (A)	25565.74	25729.11	26346.84
Current Liabilities			
Short Term Borrowings	14004.00	11959.71	8186.71
Trade Payables	4727.89	4864.96	7141.10
Other Current Liabilities	707.48	459.99	807.63
Short-term Provisions	11.07	7.17	50.93
Total (B)	19450.45	17327.83	16186.37
Net Working Capital (A) - (B)	6115.30	8401.28	10160.47

A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability. The significant amount of working capital and major portion of our working capital is utilized towards inventories and trade receivables. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations.

We would require additional working capital facilities in the future to satisfy our working capital need which is proposed to be met through the IPO proceeds. In case of our inability to obtain the requisite additional working capital finance, our internal accruals/ cash flows would be adversely affected to that extent, and consequently affect our operations, revenue and profitability

19. *We participate and operate in competitive markets with low barriers to entry which may increase competition and have a material adverse effect on our business, financial condition and results of operations.*

We operate in highly competitive market segments that are highly fragmented among several market participants. In the steel market, we compete with numerous multinational and Indian companies with sizeable market shares as well as the broader industry comprising numerous small competitors. We also believe that free information available on internet websites about steel pipes and sheets may also poses a competitive risk.

Moreover barriers to entry for the market segments in which we operate are generally low as the investment cost is very high. We anticipate these low barriers to entry, combined with forecast growth potential in the steel industry, will lead to increased competition both from established players as well as from new entrants in the industry. This could include attrition of our staff to our competitors or our staff establishing competitive enterprises.

20. *In addition to normal remuneration, other benefits and reimbursement of expenses, some of our Directors (including our Promoter) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, any amount of loan given to the company.*

Some of our Director/Promoters are interested in our Company to the extent of their shareholding, dividend rights, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors or promoters would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors or Promoters will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting.

For details relating to benefits and reimbursement of expenses to some of our directors, please refer to section title "Our Management", "Our Promoters and Promoters' Group" and Annexure VIII – "Related Party Transaction in chapter titled "Restated Financial Statement" on page nos. 138, 151, & 160 respectively of this Red Herring prospectus.

21. *Our Company has entered into certain related party transactions and may continue to do so in the future.*

Our Company has entered into related party transactions with our Promoter, Directors and the Promoter Group aggregating ₹. 360.13 Lakhs for the last period ended March, 2022. While our Company believes that all such

transactions have been conducted on the arm's length basis, there can be no assurance that it could not have been achieved on more favorable terms had such transactions not been entered into with related parties.

Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to "Annexure VIII "Related Party Transactions" on page no. 190 of this Red Herring Prospectus

22. *Our Company may incur penalties or liabilities for non-compliances with certain provisions of the Companies Act and other applicable laws in the last three (3) Years.*

We monitor compliances with applicable laws and regulations by implementing stringent internal checks and controls. Although we have generally been in compliance with applicable laws, there have been certain instances of delayed statutory filings/discrepancies/ errors. Although, no regulatory action has been taken against us with respect to the aforesaid non-compliances/errors, there can be no assurance that a regulatory action shall not be taken by the relevant authorities against us in the future. In an event such an action is taken, we may be subject to penalties and other consequences that may adversely impact our business, reputation, and results of operation and there can be no assurance that we shall be able to successfully defend any action/allegation raised by such regulatory authorities. Our compliance team meticulously follows a detailed compliance calendar providing for compliances under various applicable laws, including but not limited to, Companies Act. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

labour intensive, we are dependent on labour force for carrying out manufacturing activities. Our Company has employed 376 employees as on date of this Red Herring Prospectus, which consists of employees all of whom are on payroll. The above includes employees in the Top and middle management and also employees who are part of processing unit and office staff. It doesn't include contracted skilled and unskilled labour at our factories. Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled labour. Shortage of skilled/ unskilled personnel or work stoppages caused by disagreements with labour could have an adverse effect on our business and results of operations. We have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

26. *Orders placed by customers may be delayed, modified, cancelled or not fully paid by our customers, which may have an adverse effect on our business, financial condition and results of operations*

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, may result in the postponement of the delivery of products or cause its cancellation. Further, the order could be cancelled or there could be changes in scope and / or scheduled delivery of the products. Accordingly, it is difficult to predict with certainty if, when, and to what extent we may be able to deliver the orders placed. In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, delay or default in payment with regard to the orders placed with us, or any material disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. The results of operations of our business are dependent on our ability to effectively manage our inventories and stocks.

For the Fiscal Years ended 2021-22, 2020-21 & 2019-20, our inventories were ₹ 6943.32 Lakhs ₹ 6938.25 Lakhs & ₹ 9228.68 Lakhs respectively, which constituted 11.34%, 13.25%, & 14.02% respectively of our total revenues as per our re-stated financial statement. In case we have to effectively manage our inventory, we must be able to accurately estimate customer demand and our supply requirements and import inventory accordingly. If we misjudge expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we import, we may be required to write-down our inventory or create additional vendor financing, which could have an adverse impact on our income and cash flows. However, we closely monitor our inventories and any product which becomes slow moving, we try to sell at discounted prices to our vendors so as to liquidate inventory

31. *If we fail to maintain an effective distribution network for the supply of our stock / material or any disruption of civil infrastructure, transport or logistic services, including due to disruption in roadway transport facilities or the national railway, it may create delays in deliveries of products to our distribution centers and points of sale.*

We rely on our network of distributors to safely and efficiently distribute or supply of our products to our vendor's, distribution centers and various points of sale. Our ability to maintain and grow our products business will depend on our ability to maintain, expand and manage a distribution network that in a timely manner delivers our products in all of the cities in which we generate market demand or intend to increase our presence through our sales and marketing activities. However, a significant disruption to our distribution network or civil infrastructure, transport or logistic services resulting from numerous factors, including fire, flood or other natural disasters, signal jamming, power outages, acts of terrorism and vandalism and equipment or system failures may occur. Our insurance may not be adequate to cover some or all losses from these events. If any of these events were to occur, it could cause limited or severe delivery disruption which could result in delays of deliveries and reduced sales. In addition, our distributors are third parties over whom we have relatively limited control, and our distributors may fail to distribute our products in the manner we contemplate, impairing the effectiveness of our distribution network.

32. *Any disruption in our information technology systems may adversely affect our business, results of operations and prospects.*

In today's digital world like any other organisation we also depend extensively on the capacity and reliability of our information technology systems, which are subject to damage or incapacitation by natural disasters, human error, power loss, sabotage, computer viruses, hacking, acts of terrorism and similar events or the loss of support services from third parties. Considering the nature of our business and the industry in which we operate, it is imperative for us to have a robust information technology platform. If our data capturing, processing and sharing cannot be integrated and/or we experience any defect or disruption in the use of, or damage to, our information technology systems, it may adversely affect our operations and thereby our business and financial condition.

33. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed use of issue proceeds, as detailed in the section titled "Objects of the Issue" on page no. 80 is to be partially and/or wholly funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

34. *We have not made any dividend payments in the past and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.*

In the past, we have not made dividend payments to the shareholders of our Company. The amount of our future dividend payments, if any, will depend upon various factors including our future earnings, financial condition, cash flows and requirement to fund operations and expansion of the business. There can be no assurance that we will be able to declare dividends. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board

of Directors. For further details, please refer “Dividend Policy” on page 159 of this Red Herring Prospectus.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company has entered presently and may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details regarding our dividend policy, please see “Dividend Policy” on page no 159 of this Red Herring Prospectus.

35. *In case of any inability arise to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our sales channel and to implement systems capable of effectively accommodating our growth. However, we cannot assure that any such employees or marketing agents will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analysis of market conditions and other data or the strategies that we may use in future to use will be successful under various market conditions.

36. *Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us.*

Through this issue our Company proposes to get listed on the SME Platform of NSE and further increase its asset base in order to take the Company to the next level of operational and financial strength. Our Company will be severely dependent on its promoters to effectively implement its growth strategies. Our Promoter have been actively involved in the day to day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoter. If our Promoters are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Financial impact of the aforesaid risk cannot be reasonably quantified.

37. *Our success depends largely on our senior management and our ability to attract and retain our key personnel.*

Our success depends on the continued services and performance of our senior management and sales agents. Competition for senior employees and sales agents in the industry is intense and we may not be able to retain our existing team members or attract and retain new team members in the future. The loss of any member of our key team may adversely affect our business, results of operations and financial condition. We do not maintain key man’s life insurance for our Promoters, senior members of our management team or other key personnel.

38. *The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.*

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 80 of this Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

39. *There is no monitoring agency appointed by our Company and the deployments of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.*

As per SEBI (ICDR) Regulations, 2018 appointment of monitoring agency is required only for Issue size above ₹. 10,000 Lakh. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the Audit Committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

40. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

41. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations.

There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

42. *Third party industry and statistical data in this Red Herring Prospectus may be incomplete, incorrect or unreliable.*

We have not independently verified data from industry and other publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

43. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

44. We are exposed to the risk of delays or non-payment by our clients and other counterparties, which may also result in cash flow mismatches.

We are exposed to counter party credit risk in the usual course of our business dealings with our clients or other counterparties who may delay or fail to make payments or perform their other contractual obligations. The financial condition of our clients, business partners, suppliers and other counterparties may be affected by the performance of their business which may be impacted by several factors including general economic conditions. We cannot assure you of the continued viability of our counterparties or that we will accurately assess their creditworthiness. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. Any material non-payment or non-performance by our clients, business partners, suppliers or other counterparties could affect our financial condition, results of Operations and cash flows. For further details of our business and clients, please refer chapter titled “Our Business” and “Management Discussion & Analysis Conditions and Result of Operation” beginning on page 104 & 195 of this Red Herring Prospectus.

45. We operate in highly competitive markets and our inability to compete effectively may lead to lower market share or reduced operating margins, and adversely affect our results of operations.

India is our primary market and we face high competition in our business from local as well as nationwide players in our industry. Our key services are available from a large number of players providing same or similar services in our industry. Thus, factors affecting our competitive success include, amongst other things, price, demand for our product and/or services, brand recognition and reliability. As a result, to remain competitive in our market, we must continuously strive to reduce our procurement and administrative costs and improve our operating efficiencies. If we fail to do so, our competitors may be able to provide their services at prices lower than our prices, which would have an adverse effect on our market share and results of operations. Our competitors vary in size, and may have better financial, marketing personnel and other resources than us and certain of our competitors have a longer history of established business and reputation in the Indian market as compared with us. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising, may affect the competitiveness of our services, which may result in a decline in our revenues and profitability.

46. Prices of raw material is highly volatile and if we are unable to maintain appropriate time span between procurement and selling of our product it may cause huge losses.

In our business, manufacture and sell products in Indian market. It creates a time gap between the manufacturing and selling of our products and the cost of raw material are highly variable, which cannot be hedged. Any fluctuation in these components as aforesaid may affect our cost and supply of the services. Therefore, any significant increase in these prices due to any reasons, and our inability to pass on increased costs to our customers or reduction in demand from our customers, may adversely affect our revenue and profitability. For further details, see “Our Business” on page no. 104 of this Red Herring Prospectus.

47. Our growth will depend on our ability to build our brand and failure to do so will negatively impact our ability to effectively compete in this industry.

We believe that we need to continue to build our brand, “T.T Swastik”, which will be critical for achieving widespread recognition of our services. Promoting and positioning our brand will depend largely on the success of our marketing efforts and our ability to provide high quality services. The brand promotion activities that we may undertake may not yield increased revenues, and even if they do, any increased revenues may not offset the expenses we incur in building our brand. If we are unable to promote and maintain our brand, our business, financial condition and results of operations could be adversely affected.

48. Our operations could be adversely affected by disputes with employees.

We believe we maintain good relationships with our workforce, there can be no assurance that the Company will not experience future disruptions to its operations due to disputes or other problems with its work force.

49. Interest rate fluctuations may adversely affect the Company's business.

The Company may enter into certain borrowing arrangements to finance its capital requirements in the ordinary course of business in connection with potential acquisitions or for general working capital purposes. In the event interest rates increase, the Company's costs of borrowing will increase, and its profitability and results of operations may be adversely affected.

50. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our capacity to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business there is significant importance to find, hire, train, supervise and manage efficient employees and also to establish such process of business operations which is proficient enough to effectively achieve our growth. Instead of putting keen efforts, as mentioned here, we cannot assure that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use.

51. Our inability to manage growth could disrupt our business and reduce profitability.

A principal component of our strategy is to continuously grow by expanding the capacity, size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

SECTION IV – ABOUT THE COMPANY

GLOBAL OUTLOOK

A tentative recovery in 2021 has been followed by increasingly gloomy developments in 2022 as risks began to materialize. Global output contracted in the second quarter of this year, owing to downturns in China and Russia, while US consumer spending undershot expectations. Several shocks have hit a world economy already weakened by the pandemic: higher-than-expected inflation worldwide—especially in the United States and major European economies—triggering tighter financial conditions; a worse-than-anticipated slowdown in China, reflecting COVID-19 outbreaks and lockdowns; and further negative spillovers from the war in Ukraine.

The baseline forecast is for growth to slow from 6.1 percent last year to 3.2 percent in 2022, 0.4 percentage point lower than in the April 2022 World Economic Outlook. Lower growth earlier this year, reduced household purchasing power, and tighter monetary policy drove a downward revision of 1.4 percentage points in the United States. In China, further lockdowns and the deepening real estate crisis have led growth to be revised down by 1.1 percentage points, with major global spillovers. And in Europe, significant downgrades reflect spillovers from the war in Ukraine and tighter monetary policy. Global inflation has been revised up due to food and energy prices as well as lingering supply-demand imbalances, and is anticipated to reach 6.6 percent in advanced economies and 9.5 percent in emerging market and developing economies this year—upward revisions of 0.9 and 0.8 percentage point, respectively. In 2023, disinflationary monetary policy is expected to bite, with global output growing by just 2.9 percent.

The risks to the outlook are overwhelmingly tilted to the downside. The war in Ukraine could lead to a sudden stop of

European gas imports from Russia; inflation could be harder to bring down than anticipated either if labor markets are tighter than expected or inflation expectations unanchor; tighter global financial conditions could induce debt distress in emerging market and developing economies; renewed COVID-19 outbreaks and lockdowns as well as a further escalation of the property sector crisis might further suppress Chinese growth; and geopolitical fragmentation could impede global trade and cooperation. A plausible alternative scenario in which risks materialize, inflation rises further, and global growth declines to about 2.6 percent and 2.0 percent in 2022 and 2023, respectively, would put growth in the bottom 10 percent of outcomes since 1970.

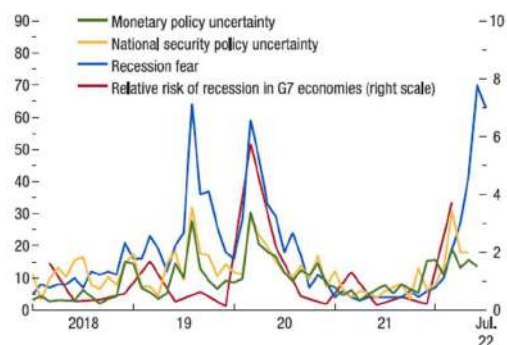

With increasing prices continuing to squeeze living standards worldwide, taming inflation should be the first priority for policymakers. Tighter monetary policy will inevitably have real economic costs, but delay will only exacerbate them. Targeted fiscal support can help cushion the impact on the most vulnerable, but with government budgets stretched by the pandemic and the need for a disinflationary overall macroeconomic policy stance, such policies will need to be offset by increased taxes or lower government spending. Tighter monetary conditions will also affect financial stability, requiring judicious use of macroprudential tools and making reforms to debt resolution frameworks all the more necessary. Policies to address specific impacts on energy and food prices should focus on those most affected without distorting prices. And as the pandemic continues, vaccination rates must rise to guard against future variants. Finally, mitigating climate change continues to require urgent multilateral action to limit emissions and raise investments to hasten the green transition.

Downturn ahead, Downside Risks Dominate

The developments make the current outlook extraordinarily uncertain. The baseline projections described in the following discussion are predicated on several assumptions, including, among others, no further unexpected reductions in flows of natural gas from Russia to the rest of Europe; that long-term inflation expectations remain stable; and no worsening of disorderly adjustments in global financial markets as a result of disinflationary monetary policy tightening.

However, there is a significant risk that some or all of these baseline assumptions will fail to hold true.

Relatedly, measures of economic uncertainty and concerns regarding an oncoming recession have increased in recent months. Estimates of the probability of recession have also increased. For example, based on information embodied in asset prices, the probability of a recession starting in Group of Seven economies is estimated to be nearly 15 percent four times its usual level—and nearer one in four in Germany.² For the United States, some indicators, such as the Federal Reserve Bank of Atlanta’s GDPNow forecasting model, suggest that a technical recession (defined as two consecutive quarters of negative growth) may already have started. Overall, in consideration of rising risks and uncertainties, this *World Economic Outlook Update* places unusually strong emphasis on an alternative scenario that illustrates the impact of several downside risks that could plausibly materialize in the near term as a complement to the baseline. Should additional shocks hit the global economy, economic outcomes would be even worse.

Global trade:

Global trade growth in 2022 and 2023 will likely slow by more than previously expected, reflecting the decline in global demand and supply chain problems. The dollar’s appreciation in 2022—by about 5 percent in nominal effective terms as of June compared with December 2021—is also likely to have slowed world trade growth, considering the dollar’s dominant role in trade invoicing as well as negative financial balance sheet effects on demand and imports in countries with dollar-denominated liabilities.

Global Growth

In the baseline scenario, global growth is 3.2 percent in 2022 and moderates to 2.9 percent in 2023, lower than projected in the April 2022 World Economic Outlook by 0.4 and 0.7 percentage point, respectively. In a number of cases, a better-than-expected growth outcome in the first quarter of 2022 offsets the subsequent slowdown, resulting in a relatively modest net

negative revision for average annual growth in 2022. Downgrades for China and the United States, as well as for India, are driving the downward revisions to global growth during 2022–23, which reflect the materialization of downside risks highlighted in the April 2022 *World Economic Outlook*: a sharper slowdown in China due to extended lockdowns, tightening global financial conditions associated with expectations of steeper interest rate hikes by major central banks to ease inflation pressure, and spillovers from the war in Ukraine. With growth near 3 percent in 2022–23, a decline in global GDP or in global GDP per capita—sometimes associated with global recession—is not currently part of the baseline scenario. However, projections for growth on a fourth-quarter-over-fourth-quarter basis point to a significant weakening of activity in the second half of 2022. While the revisions are mostly negative for advanced economies, differing exposures to the underlying developments mean that those for emerging market and developing economies are more mixed.

Inflation

The baseline projection for global inflation is also more pessimistic, having been revised up to 8.3 percent in 2022 on a fourth-quarter-over-fourth-quarter basis, from 6.9 percent in the April 2022 *World Economic Outlook*. The upside inflation revision in 2022 is larger for advanced economies, where it is expected to reach 6.3 percent from 4.8 percent projected in the April 2022 *World Economic Outlook* on a fourth-quarter-over-fourth-quarter basis, driven by significant increases in headline inflation among such major economies as the United Kingdom (a 2.7 percentage point upward revision to 10.5 percent) and the euro area (a 2.9 percentage point upward revision to 7.3 percent). Forecasts for 2023 are relatively unchanged—up by only 0.2 percentage point on a fourth-quarter-over-fourth-quarter basis—reflecting confidence that inflation will decline as central banks tighten policies and energy price base effects turn negative. For emerging market and developing economies, inflation in 2022 is expected to reach 10.0 percent on a fourth-quarter-over-fourth-quarter basis. Revisions for those economies display greater variation across countries, with relatively modest increases in emerging and developing Asia (partly because of a slowdown of activity in China and limited increases in prices of staple foods) but larger revisions for Latin America and the Caribbean (up by 3.0 percentage points) and for emerging and developing Europe (up by 2.9 percentage points).

INDIAN ECONOMY OVERVIEW

Since the 2000s, India has made remarkable progress in reducing absolute poverty. Between 2011 and 2015, more than 90 million people were lifted out of extreme poverty.

However, the COVID-19 pandemic led India's economy into a contraction of 7.3 percent in FY21, despite well-crafted fiscal and monetary policy support. Following the deadly 'second wave,' growth in FY22 is expected to be nearer to the lower bound of the range of 7.5 to 12.5 percent – still putting India among the fastest growing economies in the world. The pace of vaccination, which is increasing, will determine economic prospects this year and beyond. Successful implementation of agriculture and labor reforms would boost medium-term growth, while weakened household and corporate balance sheets may constrain it. The economic slowdown triggered by the outbreak is believed to have had a significant impact especially on poor and vulnerable households. Recent projections of GDP per capita growth, taking into account the impact of the pandemic, suggest that poverty rates in 2020 have likely reverted to estimated levels in 2016.

The informal sector, where the vast majority of India's labor force is employed, has been particularly affected. As in most countries, the pandemic has exacerbated vulnerabilities for traditionally excluded groups, such as youth, women, and migrants. Labor market indicators suggest that urban households are now more vulnerable to fall into poverty than they were before the onset of the pandemic.

The response of the government to the COVID-19 outbreak has been swift and comprehensive. A national lockdown to contain the health emergency was complemented by a comprehensive policy package to mitigate the impact on the poorest households (through various social protection measures) as well as on small and medium enterprises (through enhanced liquidity and financial support).

To build back better, it will be essential for India to stay focused on reducing inequality, even as it implements growth-oriented reforms to get the economy back on track. The World Bank is partnering with the government in this effort by helping strengthen policies, institutions, and investments to create a better future for the country and the people through green, resilient and inclusive development.

Indian Economic Outlook

After growing at very high rates for years, India's economy had already begun to slow down before the onset of the COVID-19 pandemic. Between FY17 and FY20, growth decelerated from 8.3 percent to 4.0 percent, with weaknesses in the financial sector compounded by a decline in the growth of private consumption. In FY21, the economy contracted by 7.3 percent. In response to the COVID-19 shock, the government and the Reserve Bank of India took several monetary and fiscal policy measures to support vulnerable firms and households, expand service delivery (with increased spending on health and social protection) and cushion the impact of the crisis on the economy. Thanks in part to these proactive measures, the economy is expected to rebound - with a strong base effect materializing in FY22 - and growth is expected to stabilize at around 7 percent thereafter.

Introduction

The Indian economy has fully recovered to the pre-pandemic real GDP level of 2019-20, according to the provisional estimates of GDP released on May 31, 2022. Real GDP growth in FY 2021-22 stands at 8.7%, which is 1.5% higher than the real GDP in FY 2019-20. These figures are associated with stronger growth momentum, indicating increased economic demand. The investment rate in the fourth quarter increased to its highest level in the previous nine quarters. Moreover, capacity utilisation in the manufacturing sector rose in the fourth quarter, as against the third quarter, implying a build-up in demand, which is consistent with the growth objectives of the Indian economy.

Future capital spending of the government in the Indian economy is expected to be supported by factors such as tax buoyancy, streamlined tax system, thorough assessment and rationalisation of the tariff structure and digitisation of tax filing. In the medium term, an increase in capital spending on infrastructure and asset-building projects is set to increase growth multipliers. Furthermore, revival in monsoon and Kharif sowing helped the agriculture sector gain momentum. As of July 11, 2022, the South-West monsoon has covered the entire country, resulting in 7% higher rainfall than the normal level.

India has emerged as the fastest-growing major economy in the world, and is expected to be one of the top three economic powers globally over the next 10-15 years, backed by its robust democracy and strong partnerships.

Market size

- India's nominal GDP at current prices was estimated at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy, and is planning to achieve 40% of its energy from non-fossil sources by 2030.
- According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between this period. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 1.2% of GDP in 2021-22.
- Exports fared remarkably well during the pandemic and aided recovery when all other growth engines lost steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing 70% to the country's economic activity. With the economic scenario improving on recovering from the COVID-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also launching growth-oriented policies to boost the economy. In view of this, the country witnessed many developments in the recent past, some of which are mentioned below.

- As of July 15, 2022, India's foreign exchange reserves reached US\$ 572.71 billion.
- Private equity-venture capital (PE-VC) sector investments stood at US\$ 34.1 billion, up 28% YoY, across 711 deals through January-June 2022.
- India's merchandise exports stood at US\$ 676.2 billion in FY22. In June 2022, India's merchandise exports stood at US\$ 37.9 billion, recording the highest ever exports in June 2022.
- PMI Services was at 58.9 in May 2022 compared to 57.9 in April 2022.
- In June 2022, the gross Goods and Services Tax (GST) revenue collection stood at Rs. 1.44 trillion (US\$ 18.1 billion).

- In July 2022 (until 21 July 2022), Foreign Portfolio Investment (FPI) outflows stood at Rs. 228,862 crore (US\$ 28.65 billion)
- Wheat procurement in Rabi 2021-22 and anticipated paddy purchase in Kharif 2021-22 would include 1208 lakh (120.8 million) metric tonnes of wheat and paddy from 163 lakh (16.7 million) farmers, as well as a direct payment of MSP value of Rs. 2.37 lakh crore (US\$ 31.74 billion) to their accounts.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over the recent decade, India's rapid economic growth has led to a substantial increase in demand for exports. Moreover, many of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- The Government of India is expected to increase public health spending to 2.5% of the GDP by 2025.

Road Ahead

Despite continuing geopolitical concerns, rising interest rates in the US and India and high prices of crude oil and few other commodities, economic activity in India is holding up better than anticipated. Electricity consumption, manufacturing PMI, exports, power supply and other high-frequency indicators indicate that the pace of economic activity has fully recovered from the COVID-19 pandemic shock. Economic growth is anticipated to be fueled by the effective implementation of PLI schemes, development of renewable energy sources while diversifying import dependence on crude oil and bolstering of the banking sector. Recent government initiatives to boost revenue will aid in containing the rise in the current account deficit and ensure that any potential fiscal slippage is adequately contained. Overall, the first ten days of July and June were better than the first two months of FY 2022–23, which is a cause for comfort and even cautious optimism in these testing times. According to a Boston Consulting Group (BCG) analysis, India is expected to be the third-largest consumer economy as its consumption may quadruple to US\$ 4 trillion by 2025 due to changes in consumer behaviour and spending patterns. By 2040, India is anticipated to overtake the US to become the second-largest economy in terms of purchasing power parity (PPP), according to a report by PricewaterhouseCoopers.

GLOBAL MARKET OVERVIEW

Steel is the world's most important engineering and construction material. It is used in every aspect of our lives; in cars and construction products, refrigerators and washing machines, cargo ships and surgical scalpels. It can be recycled over and over again without loss of property.

Iron is made by removing oxygen and other impurities from iron ore. When iron is combined with carbon, recycled steel and small amounts of other elements it becomes steel. Steel is an alloy of iron and carbon containing less than 2% carbon and 1% manganese and small amounts of silicon, phosphorus, sulphur and oxygen.

As populations grow and nations around the world seek to improve their standards of living, it is inevitable that the demand for steel will increase.

Steel is critical simply because no other material has the same unique combination of strength, formability and versatility. New generations of steel continue to be developed that make it possible for manufacturers and builders to implement durable, lightweight designs. Going forward, materials that are ever stronger and meet higher environmental standards will be needed.

Without being aware of it, society now depends on steel.

Humankind's future success in meeting challenges such as climate change, poverty, population growth, water distribution and energy limited by a lower carbon world depends on applications of steel.

STEEL MARKETS

1. AUTOMOTIVE

According to the International Organization of Motor Vehicle Manufacturers, 91.8 million vehicles were produced in 2019. On average, 900 kg of steel is used per vehicle.

The steel in a vehicle is distributed as follows, based on total vehicle curb mass:

- 40% is used in the body structure, panels, doors and trunk closures for high-strength and energy absorption in case of a crash
- 23% is in the drive train, consisting of cast iron for the engine block and machinable carbon steel for the wear resistant gears.
- 12% is in the suspension, using rolled high-strength steel strip.
- The remainder is found in the wheels, tyres, fuel tank, steering and breaking systems.

2. BUILDING AND INFRASTRUCTURE

Construction is one of the most important steel-using industries, accounting for more than 50% of world steel demand.

Buildings – from houses to car-parks to schools and skyscrapers – rely on steel for their strength. Steel is also used on roofs and as cladding for exterior walls.

The world's population is expected to increase by 2 billion persons in the next 30 years, from 7.7 billion currently to 9.7 billion in 2050, according to a new United Nations report launched in 2019.

3. ENERGY

Steel is used in all areas of renewable energy:

Biomass: steel is used extensively in agriculture.

Solar: steel plays a key role in converting solar energy into electricity or hot water. It is used as a base for solar thermal-panels and in pumps, tanks and heat exchangers.

Wave and tidal: a steel pile is the main component of a tidal turbine in tidal energy systems. Steel is also used to fabricate wave energy devices. The steel used is formulated to withstand the challenges of the marine environment.

Hydroelectric: steel is needed to reinforce concrete dams.

Wind: steel is the main material used in onshore and off-shore wind turbines. Almost every component of a wind turbine is made of steel, from the foundation, to the tower, gears and casings (see Steel Solutions in the Green Economy: Wind turbines). Steel provides the strength for taller, more efficient wind turbines.

4. PACKAGING

Steel cans used for food conservation preserve high levels of nutrients and vitamins.

Contrary to popular belief, canned fruits and vegetables use no chemical preservatives but are conserved via high-pressure processing techniques that kill bacteria. As an ambient packaging medium, steel cans do not require cooling in the supply chain, simplifying logistics and storage and saving energy and cost. Steel packaging offers 100% barrier protection against light, water and air, and is the most tamper-tamper-resistant food packaging option available today. The majority of steel used in packaging is tinsplate, which has been coated with a thin layer of tin, whose functionality is required for the production process. The tin layer is usually applied by electroplating.

5. TRANSPORTATION

Steel facilitates our mobility and the transport of goods. Whether in the form of bicycles, motorcycles, cars, buses, trains, ships or planes – or in the transport networks that support them – steel is essential to every mode of transport. Continuously reinforced concrete roadways are structurally supported by steel rebar and help to improve fuel efficiency for large vehicles.

6. TOOLS AND MACHINERY

Tools and machinery cover a wide range of equipment from small workshop tools to large factory-based robotic machinery and rolling mills. In 2017, tools and machinery represented approximately 15 % of global steel use. In construction, steel provides equipment such as cranes, drills, bulldozers, scaffolding and reusable and portable shelters used on construction sites. In agriculture, from basic hoes, shovels and forks, steel is there every step of the way, making agriculture easier and more efficient.

INDIAN STEEL INDUSTRY

- The Indian steel industry has entered into a new development stage, post de-regulation, riding high on the resurgent economy and rising demand for steel.
- Rapid rise in production has resulted in India becoming the 2nd largest producer of crude steel during last three years (2018-2020), from its 3rd largest status in 2017. The country was also the largest producer of Sponge Iron or DRI in the world and the 2nd largest finished steel consumer in the world after China in 2020 (provisional), based on rankings released by the World Steel Association.
- In a de-regulated, liberalized economic/market scenario like India the Government's role is that of a facilitator which lays down the policy guidelines and establishes the institutional mechanism/structure for creating conducive environment for improving efficiency and performance of the steel sector.
- In this role, the Government has released the National Steel Policy 2017, which has laid down the broad roadmap for encouraging long term growth for the Indian steel industry, both on demand and supply sides, by 2030-31. The Government has also announced a policy for providing preference to domestically manufactured Iron & Steel products in Government procurement.
- The government has also approved a Production-linked Incentive (PLI) Scheme for Specialty Steel. It is expected that the specialty steel production will become 42 million tonnes by the end of 2026-27. This will ensure that approximately 2.5 lakh crores worth of specialty steel will be produced and consumed in the country which would otherwise have been imported. Similarly, the export of specialty steel will become around 5.5 million tonnes as against the current 1.7 million tonnes of specialty steel getting FOREX of Rs 33,000 crore

1. **Construction sector:** The sector includes physical infrastructure (excluding railways) and real estate, and contributes roughly 61% of India's steel use or steel demand. The sector grew by around 3.4 percent in CY 2019. In CY 2020, the sector has been badly hit by the pandemic and is expected to decline by around 15 percent.
2. **Capital goods:** The sector contributes about 10 percent of steel demand. It has several sub-segments, of which machinery and equipment are the most prominent.
3. **Automobile sector:** The automotive sector contributes to around 9% of steel demand in India. India is the largest manufacturer of two wheelers, three wheelers and tractors, the fourth largest producer of passenger vehicles, and the seventh largest in commercial vehicles globally. Two-wheelers occupy a dominant position with around 80 percent market share and overall passenger vehicles compose 13 percent of the market.
4. **Intermediate products:** The sector contributes around 7 % of India's steel demand. This segment is closely linked to the auto sector as well as the oil and gas sector, besides industrial activity. The most prominent products under this sector include gear boxes, bearings, pipes, packaging materials like drums and barrels etc. Due to the country wide lockdown there has been weak automotive growth which has impacted their demand.
5. **Railways:** This sector, which contributes 7 % of steel demand, has been growing at a fast pace in pre COVID period. It grew by 13.4% and 32.7 % in CY 2018 and CY 2019 respectively. The sector is expected to see a positive growth from Q4 2020 onwards.

6. **Consumer Durable:** The consumer durables sector accounts for remaining 5 % of the steel use. The sector is mainly driven by segments like air-conditioners, refrigerators, furniture etc.

QUALITY

Testing and Quality Control Facilities

Besides the numerous quality assurance measures during the manufacturing process and at various inspection points, the following facilities are available for ensuring stringent quality standards.

Continuous welding is carried out by a high frequency induction out by a high frequency induction welding machine, and the steam is formed by fusing the edges without filler metal. The weld bead reinforcement (inside, if needed is removed) and the welded pipes, after cooling, are cut in appropriate length after attaining its roundness and specified outer diameter.

The pipes, after straightening, are conveyed to the finishing bay for finishing, testing and inspection. Some of these pipes are subsequently galvanized and threaded.

TENSILE STRENGTH

This test is applied for testing yield of the product and its strength, and percentage of elongation.

BEND TEST

This tests the ductility and soundness of a material.

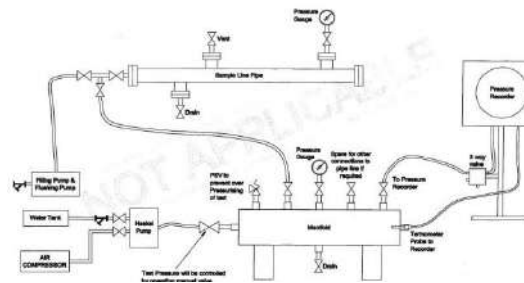

FLATTENING TEST

It is conducted by subjecting rings from the tube or pipe to a prescribed degree of flattening between two parallel platens.

HYDRO STATIC TEST (LEAK TIGHTNESS TEST)

It is the primary method used to test for leaks or breakage of the pipe.

HOT DIP GALVANIZING

Hot dip galvanizing is used as a **very effective steel corrosion protection method**, providing a long service-life. The corrosion protection is dependent on the coating thickness and environmental conditions

THE REAL ESTATE (REGULATION AND DEVELOPMENT) ACT, 2016

This Act was notified by the Parliament on 26th March, 2016 and extends to the whole of India. It establishes the Real Estate Regulatory Authority for regulations and promotions of the real estate sector and to ensure sale of plot, apartment or building, as the case may be, or sale of real estate project, in an efficient and transparent manner and to protect the interest of consumers in the real estate sector and to establish an adjudicating mechanism for speedy dispute redressal and also to establish the Appellate Tribunal to hear appeals from the decisions, directions or orders of the Real Estate Regulatory Authority and the adjudicating officer and for matters connected therewith or incidental thereto. The salient features of the Act are as following:

- Under the Act, instead of a regular forum of consumers, the purchasers of real estate units from a developer would have a specialized forum called the "Real Estate Regulatory Authority" which will be setup within one year from the date of coming into force of the Act. In the interim, the appropriate Government (i.e., the Central or State Government) shall designate any other regulatory authority or any officer preferably the Secretary of the department dealing with Housing, as the Regulatory Authority.
- The promoter has to register their project (residential as well as commercial) with the Regulatory Authority before booking, selling or offering apartments for sale in such projects. In case a project is to be promoted in phases, then each phase shall be considered as a standalone project, and the promoter shall obtain registration for each phase.
- Under the Act, developers can sell units only on carpet area, which means the net usable floor area of an apartment. This excludes the area covered by the external walls, areas under services shafts, exclusive balcony or verandah area and exclusive open terrace area, but includes the area covered by the internal partition walls of the apartment.
- The Act mandates that a promoter shall deposit 70% of the amount realised from the allottees, from time to time, in a separate account to be maintained in a scheduled bank. This is intended to cover the cost of construction and the land cost and the amount deposited shall be used only for the concerned project.
- Stringent penal provisions have been prescribed under the Act against the promoter in case of any contravention or non-compliance of the provisions of the Act or the orders, decisions or directions of the Regulatory Authority or the Appellate Tribunal which are the following: a) If promoter does not register its project with the Regulatory Authority – the penalty may be up to 10% of the estimated cost of the project as determined by the Regulatory Authority; b) If promoter does not comply with the aforesaid order of the Regulatory Authority - imprisonment of up to three years and a further penalty of up to 10% of the estimated cost, or both; and c) In case the promoter provides any false information while making an application to the Regulatory Authority or contravenes any other provision of the Act – the penalty may be up to 5% of the estimated cost of the project or construction.

STATE LAW

URBAN DEVELOPMENT LAWS

State legislations provide for the planned development of urban areas and the establishment of regional and local development authorities charged with the responsibility of planning and development of urban areas within their jurisdiction. Real estate projects have to be planned and developed in conformity with the norms established in these laws and regulations made thereunder and require sanctions from the government departments and developmental authorities at various stages. For instance, in certain states such as Haryana, for developing a residential colony, a license is required from the relevant local authority. Where projects are undertaken on lands which form part of the approved layout plans and/or fall within municipal limits of a town, generally the building plans of the projects have to be approved by the concerned municipal or developmental

authority. Building plans are required to be approved for each building within the project area. Clearances with respect to other aspects of development such as fire, civil aviation and pollution control are required from appropriate authorities depending on the nature, size and height of the projects. The approvals granted by the authorities generally prescribe a time limit for completion of the projects. These time limits are renewable upon payment of a prescribed fee. The regulations provide for obtaining a completion/occupancy certificate upon completion of the project.

AGRICULTURAL DEVELOPMENT LAWS

The acquisition of land is regulated by state land reform laws which prescribe limits up to which an entity may acquire agricultural land. Any transfer of land which results in the aggregate land holdings of the acquirer in the state exceeding this ceiling is void, and the surplus land is deemed, from the date of the transfer, to have been vested in the state government free of all encumbrances. When local authorities declare certain agricultural areas as earmarked for townships, lands are acquired by different entities. After obtaining a conversion certificate from the appropriate authority with respect to a change in the use of the land from agricultural to non-agricultural for development into townships, commercial complexes etc., such ceilings are not applicable. While granting licenses for development of townships, the authorities generally levy development/ external development charges for provision of peripheral services. Such licenses require approvals of layout plans for development and building plans for construction activities. The licenses are transferable on permission of the appropriate authority. Similar to urban development laws, approvals of the layout plans and building plans, if applicable, need to be obtained.

NATIONAL ENVIRONMENTAL POLICY, 2006

The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace, but builds on the earlier policies. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of National Environmental Policy:

- Conservation of Critical Environmental Resources
- Intra-generational Equity: Livelihood Security for the Poor
- Inter-generational Equity

9. Employee benefit Plan

(A) Defined benefit Plan

The defined benefit plan operated by the Company is as below:

Retiring gratuity

The Company has an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump-sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 to 30 days salary payable for each completed year of service. Vesting occurs upon completion of five years of service. The Company does not make any contributions to gratuity funds and the plan is unfunded. The Company accounts for the liability for gratuity benefits payable in the future based on an actuarial valuation.

The defined benefit plans expose the Company to a number of actuarial risks as below:

- Investment risk:** The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to Government Bonds Yield. If plan liability is funded and return on plan assets is below this rate, it will create a plan deficit.
- Interest risk:** A decrease in the bond interstate (discount rate) will increase the plan liability.
- Mortality risk:** The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants. For this report we have used Indian Assured Lives Mortality (2012-14) ultimate table.
- Salary risk:** The present value of the defined benefit plan liability is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.

The following table sets out the amounts recognised in the financial statements in respect of retiring gratuity plan:

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars propose to introduce and implement the UPI Mechanism in three phases in the following manner:

- a. Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b. Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.
- c. Phase III: Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 and SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2022/75 dated May 30, 2022.

Further, pursuant to SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 5, 2022, all Retail Individual Bidders applying in public issues where the application amount is up to ₹500,000 shall use UPI and shall also provide their UPI ID in the Bid cum Application Form submitted with any of the entities mentioned herein below:

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory based model of e-commerce. In accordance with the FEMA Non-debt Rules, participation by non-residents in the Issue is restricted to participation by (i) FPIs under Schedule II of the FEMA Non-debt Rules, subject to limit of the individual holding of an FPI below 10% of the post-Issue paid-up capital of our Company and the aggregate limit for FPI investment currently not exceeding the sectoral cap i.e. 51% of the post issue paid up share capital; and (ii) Eligible NRIs applying only on a non-repatriation basis under Schedule IV of the FEMA Non-debt Rules. Further, other non-residents applying on a repatriation basis, FVCIs and multilateral and bilateral development financial institutions are not permitted to participate in the Issue. As per the existing policy of the Government of India, OCBs cannot participate in this issue. See “Issue Procedure” beginning on page 236.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (–DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

The foreign investment in our Company is governed by, inter-alia, the FEMA, the FEMA Non-debt Rules, the FDI Policy issued and amended by way of press notes.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. See “Issue Procedure” beginning on page 236.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Offer Period.
